Bachelor's degree in Computer Science, possessing a robust foundation in software development, data analysis, and cloud computing. Experienced in building user-focused applications and integrating machine learning models—including Generative AI—with web/mobile platforms. Proven capability to design scalable architectures, develop REST APIs, and build end-to-end data pipelines. Possesses a unique advantage by combining IT technical expertise and professional experience in creative digital production to produce technology products that are not only highly functional but also visually compelling. Ready to drive technical innovation as a Full-Stack Developer, Front-End/Back-End Developer, Data Scientist, or Data Analyst.

Profesional / Work Experience

PT Wesclic Indonesia Neotech - **Yogyakarta, Indonesia** Aug 2025 - Nov 2025

Multimedia Specialist (Intern)

- Digital Asset Production: Produced and optimized 20+ high-quality multimedia content using professional software (Premiere Pro, After Effects) to support the company's digital branding and technology campaigns, increasing online engagement by 15%.
- Workflow Efficiency: Successfully managed communication, digital asset distribution, and project handovers between remote and in-office teams in a hybrid arrangement, reducing project turnaround time by 20%.
- Technical Implementation: Applied technical software skills and visual storytelling concepts to enhance the overall quality of 30+ company digital assets.

Education

UIN Sunan Kalijaga Yogyakarta - **Yogyakarta, Indonesia** Sep 2021 - Aug 2025

Bachelor of Informatics, 3.54/4.00

- Graduated with a strong focus on software development and UI/UX design. Successfully developed final projects combining complex programming with user-centered design principles.
- Active in extracurricular activities focusing on digital media production, enhancing capabilities in digital asset management and visual communication.

Bangkit Academy - **Indonesia** Aug 2023 - Jan 2024

Certificate in Mobile Development

- Collaborated in a cross-functional team to develop a Capstone Project (Frency App), applying Agile methodology and product-thinking to solve real-world accessibility problems.

Organizational Experiences

Dewan Eksekutif Mahasiswa - **UIN Sunan Kalijaga Yogyakarta** Apr 2022 - Apr 2023

Media, Information, and Communication

- Digital Asset Management: Managed visual communication and content creation for the association's internal and external digital platforms, producing 20+ design and media assets.
- Cross-Functional Collaboration: Collaborated with 3 other divisions to plan, design, and execute communication strategies and public outreach campaigns reaching 500+ students.
- Content Strategy: Developed and maintained the organization's digital identity through consistent visual design and content management across 3 social media channels.

Project and Capabilities

- **Professional Certifications**: Earned "Gen AI Application Development" and "Data Science with Microsoft Fabric" from Dicoding & Microsoft (2026). Completed 10+ additional professional courses in Machine Learning, Data Science, and Android Development from Dicoding and IBM.
- **Web & Software Development**: React, Vite, Tailwind CSS, HTML5, CSS3, JavaScript, Java/Kotlin, C#, Android Studio.
- **Data Science, AI & Analytics**: Python (Data Science), Generative AI, Machine Learning (Clustering & Classification), Data Visualization, SQL, ETL Pipelines.
- **Data Storage & Workflow**: Room Database, DataStore, JSON Parsing, Git, Agile Methodology.
- **Cloud & Architecture**: Microsoft Azure, Microsoft Fabric, REST APIs, Android Architecture Components, SOLID Principles.
- **UI/UX & Design Tools**: UI/UX Principles, Figma, Adobe Premiere Pro, After Effects.
- **AI-Powered Coffee Shop Web App (Full-Stack)**: Built an interactive, React-based e-commerce application integrated with the Google Gemini API to provide smart, data-driven recommendations, handling 50+ product catalogs and improving search relevancy by 30%.
- **Heavy Machinery Corporate Website (Front-End)**: Developed a modern, responsive company profile website for the mining industry using React, Vite, and Tailwind CSS, achieving a 90+ Lighthouse performance score and optimizing UI/UX for desktop and mobile screens.
- **Fraud Detection Machine Learning (Data Science)**: Built and trained machine learning models to detect financial anomalies and fraud using clustering and classification techniques, achieving an accuracy rate of 85% on a dataset of 10,000+ mock transactions.
- **Frency App-Sign Language Translator (Mobile/ML)**: Developed an Android app that translates sign language to human language in real-time via camera sensors. Built with a cross-functional team of 6 members using Agile methodology, translating 30+ sign vocabularies.
- **ETL Pipeline for E-commerce (Data Engineering)**: Designed a data processing architecture using Python to extract, clean, and analyze 50,000+ rows of e-commerce datasets, automating the pipeline to reduce manual processing time by 40%.
- **Roslyn OOP Analyzer (Software Engineering)**: Created a static code analysis tool using C# Windows Forms to evaluate the efficiency and structure of Object-Oriented Programming (MOOD) metrics for 5+ software projects.
- **Story App (Mobile Development)**: Developed an intermediate photo-sharing application implementing paging, background threads, and local database storage, supporting seamless scrolling for 50+ image feeds.
- **Soft Skills**: Teamwork & Collaboration, Leadership & Organizational Skills, Effective Communication (Visual & Verbal), Problem-Solving (Product-Thinking), Creativity & Adaptability.
